GRECO

The Winery

A little born from a great passion for viticulture and a love for the homeland. beginning of the story of our winery back in 1973, when Greco founded it. A story full of commitment and sacrifice, perseverance and constant research; a story that was even more enriched when the firstborn son of Romaldo, Antongiulio, decided to accompany his father with his wealth of managerial experience, gradually but persistently turning the dream into a solid company. The logical consequence of this was the creation of a dynamic and passionate team that has chosen to avail itself of the wine-making wisdom and experience of Gruppo Matura.

The Project

In a land as Salento, harsh and generous at the same time, where the reliability of the mediterranean sun meets the hardness of salty winds, the Greco Winery has decided to undertake a work process that celebrates both tradition and innovation, bearing the principles of its roots and projecting itself into future challenges, essential aim of the "GrecoProject". From this point of view, the family estates Valentini, Murrone, Conte Grande and Vinci - where international

grapes flank historic vineyards - offer a perfect synthesis of the visions of the company, thanks to their heterogeneity in exposure and soil texture. The most advanced working methods and techniques, both in winegrowing and in winemaking, enable a production that keeps intact the original properties of the grapes and an enviable quality/priceratio. In this context, the wines reflect all the beliefs of Romaldo. History and Future. Poetry and Prose. Dream and Reality.
